

11/18 Webinar: Avoid the nightmare of Frankensuite multiple vendor software solutions

Can you honestly say that all your nonintegrated software solutions work together seamlessly? Has your local government cobbled together a Frankensuite that's causing more headaches than efficiencies? You're not alone and there is an answer.

On November 18th, 2020, Dave Schultz, Director of Finance for the City of Callaway, Florida, will relate his story of managing out of a Frankensuite nightmare and adopting a system that created true efficiencies, making him a hometown hero with the citizenry to boot.

Springbrook Enterprise

For agencies on Springbrook Cloud and v7.18.0.0 new features are now available. You can now import files into the Payroll Timesheets and Accounts Receivable Invoice processes.

The Human Resources Bulk Deductions, Human Resources Pay Adjustments, and General Ledger Journal Entries processes now support workflows.

The Federal Tax Table Update utility has been added to Payroll allowing you to automatically update tax tables.

More information on these enhancements can be found [here](#).

CivicPay Online Automated Payments has new product updates!

For agencies using Springbrook's Automated Payments offering, all auto pay members can now adjust the amount to pay for their scheduled payment.

Agencies hosted on Springbrook Cloud can now offer their members new options for payment amount and date of payment. Members can now be given the options to:

Setup auto pay to use the total balance at time of billing as the payment amount.

Have their date of payment be up to 15 days prior to the due date (you choose the allowed number of days).

More information on these features and how to enable them can be found on our [Springbrook success page](#).

If you do not have a login you will be given the option to self-register.

If you are not currently using Automated Payments and are interested in more information, please contact your account manager or support.
