SpringbrookCirrus

SaaS Multi-Tenant Cloud

Enterprise-grade solutions without the high cost and complexity...available for government agencies!

Empower your local government staff with cutting-edge features tailored for peak efficiency through our cost-effective Software as a Service (SaaS) solution. As your organization evolves, let Springbrook's experts shoulder the weight of management and monitoring. Gain seamless access to the latest features, patches, and software enhancements, effortlessly staying ahead of the curve.

Finance Suite · Tax Collection · Payment Solutions · Tableau Reporting & Analytics · Advanced Budgeting · HR/Payroll Employee Self Service · Utility Billing · SpringbrookCirrus · Employees · Citizens

All clouds are not created equal! Outdated ERPs waste staff time and don't provide the features and security today's municipalities require. Springbrook's multi-tenant SaaS cloud sets the bar for efficiency and scalability. Hosted cloud solutions are basically on-premises solutions on someone else's server, while on-premises solutions put the entire onus of hardware and software management on your staff.

Robust, Standardized Cybersecurity

Safeguard your system and resources with best of class cybersecurity for government agencies. Springbrook's centrally managed policies ensure that security configurations are consistent and standardized across locations.

Seamless Scalability and Flexibility

Invest in a system that grows with your organization. A SaaS solution empowers you to seamlessly scale your system up or down based on current demands and supports customizations for individual tenants while maintaining the benefits of shared resources.

Fully Managed Solutions

Offload the management of your finance ERP to the experts and reduce IT overhead. Springbrook's SaaS multi-tenant cloud solutions free your staff from server maintenance, hardware management, continuous monitoring, incident response, and worrying about cybersecurity protocols so they can focus on core business activities.

Improved Cost Efficiency

Say goodbye to large capital expenditures and ease budgeting with the predictable cost of a cloud-based SaaS solution. Springbrook's multi-tenant infrastructure and shared resource model reduce the need for individual investments or in-house infrastructure experts and optimize the allocation of bandwidth, storage, and computing power.

Leverage the power and cost savings of a fully managed, cloud-based solution.

	Multi-Tenant SaaS	Hosted Cloud	On Premises
