Springbrook

Cirrus Finance Suite

Automate your agency's finance in one powerful, integrated, cloud-native platform.

Gain complete control and visibility across budgeting, payroll, procurement, and more with a comprehensive suite of intuitive tools designed specifically for government.

Eliminate manual entry.

Automate recurring invoices, bank reconciliations, ACH transactions, and the full fixed asset lifecycle.

Trust, but verify.

Protect your data and maintain compliance with built-in internal controls and detailed audit trails.

Drive progress from one dashboard.

Access a fully customizable, user-friendly dashboard that centralizes approvals, tasks, and real-time financial activity—all in one place.

Customize reports with ease.

Leverage built-in templates and advanced filters to automate, schedule, and tailor reports—giving you the insights you need, when you need them.

Deliver maximum transparency.

Empower stakeholders with real-time data access and a powerful mobile application.

One Platform. Total Integration.

Seamlessly connect every function across the Springbrook Cirrus Finance platform.

Modules

General Ledger

Power your entire ERP with a cloud-hosted General Ledger that unifies every transaction across your finance ecosystem. Real-time reporting, customizable dashboard views, full audit trails, and robust budgeting tools help you plan, monitor, and control finances with confidence from baseline setup to adjustments and variances.

System Wide Access

Lay the foundation for control and consistency across your agency with Springbrook's centralized System Wide Access. Manage global settings, user roles, and approval workflows from one place—ensuring audit readiness, stronger governance, and simplified security configuration across all modules.

Bank Reconciliation

Reduce risk and increase confidence by keeping financial records and bank statements in synch. Automatically clear checks and deposits, flag discrepancies, and generate detailed reconciliation reports. Built-in dashboards and scheduled reporting help your team stay proactive, accurate, and audit-ready.

Accounts Payable

Accelerate the entire vendor payment lifecycle and reduce manual entry with Springbrook's fully integrated AP module. Automate every step—from invoice capture and recurring entries to scheduled ACH and electronic payments. AI-powered invoice matching speeds reconciliation, while built-in audit trails deliver complete transparency.

Advanced Budgeting

Streamline budgeting and forecasting with Springbrook's Advanced Budgeting platform—built for performance and collaboration in local government. Automate budget workflows, model complex scenarios, and track KPIs in real time. With Excel-compatible reporting and intuitive dashboards, finance teams can plan smarter and make data-driven decisions with complete confidence.

Cash Receipting

Simplify revenue collection—cash, checks, credit cards, or electronic imports—and streamline posting and reconciliation with Springbrook's Cash Receipts module. Delivers real-time visibility into cash flow with flexible payment configurations, AR and Utility Billing integration, and audit-ready workflows.

AI Invoicing

Transform your AP workflow and increase accuracy with Springbrook's AI Invoicing. Upload an invoice and let the system do the work—automatically reading, coding, and assigning vendor details. Every invoice is stored with its transaction, creating a clear audit trail and stronger financial oversight.

Clearing House

Power fast, secure electronic funds transfers with Springbrook's Clearing House. Handle ACH payments, payroll direct deposits, customer debits, and reversals—all in one automated engine. Reduce errors, eliminate paper checks, and accelerate transactions with full audit traceability built in.

Springbrook Analytics

Unlock actionable insights with Springbrook Analytics powered by Tableau. Hit the ground running with prebuilt reports or create custom visualizations with drag-and-drop dashboards, predictive analytics, data blending from multiple sources, and collaborative sharing of key financial, operational, and citizen service metrics.

Add-ons

Accounts Receivable

Streamline billing and collections with Springbrook's Accounts Receivable module. Manage customer accounts, automate recurring billing, and generate statements on demand. Full financial integration, revenue GL allocation, and detailed transaction histories improve transparency.

Special Assessments

Manage assessment loans from setup to payoff with a fully integrated Special Assessments module. Automate billing, amortization schedules, adjustment and penalties for an accurate tracking of accounts, principal, and interest, and provide citizens with a convenient way to manage their assessments online.

Purchase Orders

Simplify procurement with built-in controls, approvals, and seamless integration with Springbrook's Purchase Order module. Automate approvals, link requisitions to AP, Inventory, Work Orders, and Projects, and leverage support for change orders, fiscal year rollovers, and vendor communication for a complete and transparent purchasing process.

Licenses & Permits

Create, renew, and manage business licenses and permits with ease. Configure license types to your needs, set fees, manage payments and renewals, and generate customizable correspondence across a wide range of permit categories, from contractors and vehicles to pets and vendors.

Building Permits

Streamline the permitting lifecycle from application to inspection. Automate approvals, standardize processes, assign and track inspections, and calculate costs consistently with valuation units. Fully configurable to local codes, the module delivers permitting efficiency and complete process visibility.

Code and Contact Management

Centralize citizen interactions and issue tracking with the Code and Contact Management module. Handle and record everything from service requests to code violations, in one place, and standardize how cases are created, routed, and resolved, with configurable workflows and issue types to ensure consistency and accountability.

Project Management

Gain full visibility into every initiative and keep projects on time and budget. Automatically organize transactions from AP, Payroll, Work Orders, and more by project, task, and type code, and track labor, materials, and services in one place for easy budget-cost comparisons.

Fixed Assets

Manage the complete asset lifecycle—from acquisition to disposal—with full audit trails and financial integration. Springbrook's Fixed Assets module automates depreciation and categorizes assets for precise reporting. Quick asset imports from Excel or AP, and built-in tracking tools for inventory management empower you to maintain accurate records that support compliance.

Work Orders

Track projects of any scale with a fully integrated financial work order system. Capture labor, materials, and service data through employee timesheets, manage estimates and maintenance schedules, and ensure accurate costing.

Inventory Control

Gain full control over supplies, track items across locations, update counts with handheld devices, manage reorders, and capture vendor pricing history in one place. Integrated with AP, POs, and Work Orders, the module streamlines workflows across your finance platform while providing clear usage, cost, and stock-level reporting.

SpringbrookCirrus

Power Every Financial Move with One Secure, Cloud-Native Platform

Simplify government operations with Springbrook Cirrus—an all-in-one, cloud-based suite of fully integrated tools designed to manage cash flow, budgets, utilities, payroll, assets and more with ease. Deliver powerful insights with Tableau, the industry's leading reporting and analytics tool, included with the Cirrus cloud application.
